EDUCATION *Bachelor in Computer Engineering - Unfinished* February 2014 - December 2015
Federal University of Rio Grande do Sul, UFRGS, Porto Alegre, Brazil

HABILITIES *Programming Languages:* C, C++, Python.
Mastership in Statistical Softwares: R and Stata.
Operational Systems: Linux, Windows, OSX.
Additional Softwares: Microsoft Office, Adobe Photoshop CC.
Data analysis environment:

- *Big Data:* Hadoop(Hive), Spark, PrestoDB, AWS Athena and GCP BigQuery environments;
- *Relational Data Analysis:* Microsoft SQL Server, PostgreSQL;
- *Data Visualization platforms:* Power BI, Tableau, Shiny(R);

Development environments:

- *Containerization of data science applications:* Docker, ECS, EKS;
- *Deployment of microservices that collect and share data through Kafka topics;*
- *Configuration and deployment of EMR Cluster with Spark, R and Python stacks available and integration with a data lake to be used by other data analysts and scientists;*
- *Development of backend microservices using Python and the FastAPI framework;*

LANGUAGES *Portuguese:* Native
English: Advanced with proficiency
College Yes Cultural (Caxias do Sul, RS, Brazil)

- Two-month English as a Second Language Course at Toronto, ON, Canada Western Town College (Toronto, ON, Canada)
- TOEFL ITP 2016
 - Total Score: 633

EVENTS *First IEEE Summer School on Smart Cities*

- Natal, RN, Brazil
- 60 hours
 - Data Visualization Prize

The Developer's Conference - Porto Alegre, RS, Brazil 2018

- Big Data - 8 hours
- Machine Learning - 8 hours

The Developer's Conference - Porto Alegre, RS, Brazil 2019

- DevOps Tools - 8 hours

EXPERIENCE	<i>Data Scientist I</i> Agibank	May 2018 - June 2019
	<ul style="list-style-type: none"> • Deployment of data visualization reports using Power Bi and Tableau to support business decisions; • Using on-premises APIs to extract and analyze data; • Experience integrating the R Statistical Programming Language with Data Visualization tools and Microsoft SQL Server; • Connecting R with big data environments such as the Hadoop/Spark stack; 	
	<i>Senior Data Scientist</i> Portocred	June 2019 - September 2019
	<ul style="list-style-type: none"> • Development of credit models; • Structuring the Data Science pipeline, since data ETL, analysis, modelling and deployment using APIs; • Deployment of behaviour model using AWS Lambda and AWS SageMaker; 	
	<i>Mid-Senior Data Scientist</i> Confederação das Cooperativas do SICREDI	October 2019 - Current
	<ul style="list-style-type: none"> • Automation of Machine Learning model routines in batch, so that they run in specific predetermined times, as well as the containerization of those processes to ensure stability and reproducibility of them; • Development of standards and routines to ensure that data scientists and data analysts work following some patterns, ensuring and enforcing that this standards helps reproducibility of code and the capacity of others to understand what each person did; • Development of shell scripts along with Terraform code to provision EMR clusters in AWS environments ensuring the installation of the tools that are required by data scientists and data analysts to explore data and develop machine learning models; • Development with the DevOps teams of a <i>self-service</i> solution for data scientists and data analysts to provision their cloud environments according to their needs (RStudio Server Open Source or JupyterHUB), following the standards of Infrastructure as a Code and using the Hashicorp stack (Packer, Terraform, Vault and Consul); • Automation of the deployment of Machine Learning models through Git repositories. • Development of a recommendation engine to ensure that users receive the offer that best fits them, my main role in this project was the development of backend microservices that serve multiple ML models through APIs; 	
ADDITIONAL INFORMATION	<i>Data Analyst with Python</i>	2019 - Datacamp
	<ul style="list-style-type: none"> • 47 hours 	
	<i>Text published in Towards Data Science</i>	2020 - Medium
	<ul style="list-style-type: none"> • Using RStudio Project Templates to help the project standardization in data science teams 	
	<i>Text published in Towards Data Science</i>	2020 - Medium
	<ul style="list-style-type: none"> • Using GitHub Actions to speed up CI/CD in data science projects
